NETWORK ACCEPTABLE USE POLICY

Process Area	ICT
Reference Number	ICT/001
Directorate	Finance and Planning

Issue No	Date	Details	Author	Approved
001	Feb 2008	First Issue	ICT MG	SMT
002	Jan 2013	Updates to all sections	S Todd	SMT
003	Jan 2014	Reviewed – no updates to text, new logo added.	JO'H	BD
004	Jan 2017	Reviewed minor updates to learner requirements applied	S Todd	Governing Body
005	Dec 2019	Reviewed to separate policy and procedural note	ST/TMG	Governing Body F&GP

If requested, the College will make the policy available by means of alternative formats including large print, Braille, audio cassette and computer disc. The policy can also be downloaded from the College intranet and made available in alternative languages as required.

1. POLICY STATEMENT

This policy should be read in conjunction with the Acceptable Use Procedural Note.

All users of the College ICT Systems and Services are bound by this policy at all times when using equipment, software or services provided by the College.

Southern Regional College will provide access to a range of information technology resources to assist teaching and learning, research and information handling. In addition, teaching and support staff will have controlled access to a range of business support applications. This represents a considerable commitment of College resources in the areas of telecommunications, networking, software and storage. It is important that there are rules in place that define what is deemed acceptable in order to ensure that the College's IT resources are not misused in anyway.

The purpose of this Policy and related procedure is to:

- Outline for staff, learners and other authorised users the acceptable and unacceptable use of these resources.

- To protect the College, it's students, staff, partners and those using our ICT facilities from illegal, inappropriate or damaging actions.

- To ensure resources are used in an appropriate manor allowing users to be more productive and effective in their use. The primary use of College ICT facilities should be for academic and business purposes.

- To ensure the availability of systems and services for all users and prevent impact through inappropriate or damaging actions.

- To outline how the College will respond to any potential breaches of these rules.

2. SCOPE

This policy applies to all authorised Users of College IT resources (see definition below).

This policy applies to all areas of the College network, associated IT systems and information.

The College IT networks are connected to other educational institutions and to the rest of the internet via JANET, the electronic communications network and associated electronic communications and networking services and facilities that support the requirements of the UK education and research communities. Acceptance of this College Policy is deemed to be acceptance of the JANET Acceptable Use Policy (https://community.ja.net/library/acceptableuse-policy).

3. DEFINITIONS

ICT	Information Communication Technology
JANET	Joint Academic Network, the college's internet service provider.
Social Networking Sites	Includes but is not limited to: e-mail, blogs, forums, micro-blogging, social networking, social network aggregation, wikis, social bookmarking and tagging, photo sharing, video sharing, and virtual worlds. It is acknowledged that the scope of this policy will continue to evolve as new technologies and tools become available.
Hacking	Intentionally interfere with the normal operation of the network, including the propagation of computer viruses, by-passing filtering systems or sustained high volume network traffic which substantially hinders others in their use of the network.
Section Managers (Information Owners)	These are usually the Head of Department with responsibility for the information contained within their department.
User	Any person who operates, has access to or interfaces with IT. This includes College employees, workers and Governing Body members, students, contractors, sub-contractors, consultants, business partners, official visitors or customers of the College.
Privileged user	Any user who has been provided with elevated access permissions to Physical, Systems and Information.

4. GENERAL PRINCIPALS

By using College IT resources, the user has personal responsibility for their appropriate use and agrees to comply with this policy and other applicable College policies and all relevant laws and regulations. This will help to ensure the security, confidentiality and safety of the College's IT resources.

Access to IT resources at the College is a privilege, not a right, and all users must act honestly and responsibly.

The College is committed to providing an effective and responsive network for use by staff and learners. Whilst the College will continue to invest in the network infrastructure there is a clear need to outline the issues that affect all staff, learners and other authorised users using the network and Internet.

Productivity – the information and resources available through the College's network can help staff, learners and other authorised users to be more productive and effective in their teaching and learning. If the Internet is subject to misuse however, it can have a significant negative effect on performance.

Bandwidth management – video, music, sound and on-line images are data intensive and can be a considerable drain on valuable network bandwidth. Similarly, heavily accessed sites that are not relevant to staff, learners and other authorised users bring unnecessary increase in network traffic.

Legal liability – Any network user who visits illegal or offensive web sites and downloads material may commit a criminal offence and may be treated as a serious disciplinary issue.

Furthermore, if staff, learners and other authorised users casually visit a site which a college sees and finds offensive, the College could be held liable for not taking steps to prevent such material from being displayed.

Adverse publicity – Several companies have been forced to dismiss employees that were found guilty of accessing illegal and offensive material through the Internet. Adverse publicity relating to staff, learners and other authorised uses can clearly be very damaging.

Security- Network users can use the Internet to send and receive information that could be infected with viruses. Such viruses if allowed could infect the entire network system.

The College is committed to implementing a series of measures to ensure that the risk to its ICT Systems are minimised and that users are made aware of what is deemed acceptable use of network resources. The College will deploy software to block access to inappropriate and illegal material on the Internet from all sites that it knows about. These sites constantly change, and IT cannot guarantee to block access to all such sites at any one time.

Data transmitted or received using College IT systems may be stored by the College and may be used by the College in ensuring it can enforce relevant legislation.

5. MONITORING

The College respects the privacy and academic freedom of staff and students. However, the College may carry out lawful monitoring of ICT systems. Staff, students and any other authorised users should be aware that the College may access documents, email, telephone and any other electronic communications, whether stored or in transit. This is in order to:

- comply with the law and applicable regulations;
- to ensure appropriate use of the College ICT systems and to prevent or detect misuse;
- in the interests of security;
- to investigate or detect unauthorised use of networked systems;
- to secure effective system operation;
- in association with specialist training.

All access and monitoring will comply with UK legislation as identified in related documents.

6. RESPONSIBILITIES

6.1 Governing Body and Chief Executive

The Governing Body and Chief Executive shall:

- have overall responsibility for the development, review and monitoring of this policy on a continuing basis; and

- ensure that users of College ICT systems follow and adhere to good practice in relation to the use of ICT. The Acceptable Use policy and associated procedural note form the basis of a framework of policies regarding the use of ICT system and information security.

6.2 Section Managers (Information Owners)

Section Managers with specific 'Line of Business' applications within their department must ensure:

- that this policy and associated procedural note is applied to the use of systems within their responsibility; and

- be aware of their responsibilities as an information owner and ensure appropriate controls are in place to protect the information they are responsible for.

6.3 Head of ICT and Network Systems

- The Head of ICT and Network Systems must ensure that the Acceptable Usage Policy and associated procedural note is applied.

- Ensure any monitoring of ICT system is completed in compliance with UK legislation.

- Ensure appropriate guidance is issued on the acceptable and unacceptable use of ICT Systems via the Acceptable Usage procedural note.

6.4 Privileged Users

Privileged Users shall only use elevated access in line with the purpose for which it has been allocated.

6.5 Users

- Acceptable use of SRC's information systems & facilities is defined as their use for the College's teaching, learning, research and administrative activities. For students, this includes research and assignment work. For staff, this includes administrative, teaching and research activities.

- Users must act in accordance with UK law, and material imported or transmitted across international boundaries must not contravene international laws or treaties.

- Users must not carry out any activity identified as unacceptable as defined with the Network Acceptable Use Policy Procedure for implementation.

- All users must be familiar with relevant College policies and procedures and take note of guidance on security as issued by IT Services. Failure to conform to these requirements may lead to suspension of account privileges or other disciplinary action as appropriate.

- Any suspected breach or misuse of a user account should be reported immediately to your line manager or head of faculty and IT Services.

- Individual users of the Internet are responsible for their behaviour and communications over the network.

- Users must treat equipment issued to them with due care and respond appropriately to requests relating to maintenance or return.

- Follow any guidance issued by IT Services relating to use of IT Services.

- Occasional and moderate use of college information systems facilities for private use is permitted, provided it does not occupy class time or the employer's time, and does not entail trading or selling. College e-mail address must not be provided in relation to the private use of any on-line service.

- On-going use of computing facilities by users constitutes acceptance of the Acceptable Use Policy.

- Users may be held personally liable for the consequences of misuse. Where misuse is illegal or unlawful, or results in loss or damage to College resources or the resources of third parties, the matter may be referred for legal action.

- Where necessary, on violation of the policy, services may be withdrawn from a user. Breach of this policy will be referred for appropriate disciplinary action.

- Users must respect the rights of other computer users, respect the integrity of physical facilities and controls, and respect all licence and contractual agreements related to College IT systems. All users must act in accordance with these responsibilities, and the relevant local, national and international laws where applicable.

- All existing College policies and regulations apply to a user's conduct on the Internet and Network, especially (but not exclusively) those that deal with unacceptable behaviour, privacy, misuse of College resources, harassment, information and data security and confidentiality.

7. FLOW CHART

None.

Network Acceptable Use Policy

Staff Statement of Compliance

Name:	
National Insurance Number:	
Department:	
Line Manager's name:	

I have read the College's Network Acceptable Use Policy and Procedural Note. I fully understand the terms and conditions of this policy and agree to abide by it. I realise that the College's security software may record for management use the Internet address of any site I visit and keep a record of any network activity in which I transmit or receive any kind of file. I acknowledge that any message I send or receive may be recorded and stored in an archive file. I know that any violation of this policy may lead to disciplinary action being taken.

Staff Signature:		Date:	

The full version of this Policy is available on the College's Policy Centre.
