

# Thompson Aero Seating

Thompsons is a long-standing and highly valued partnership client, working closely with us to develop the skills and confidence of their workforce. They have invested in the professional development of their staff through ILM Level 3 and Level 5 programmes, supporting progression across a range of roles.

All training is carefully tailored to align with Thompsons' organisational needs and objectives, ensuring relevance and immediate impact in the workplace. This bespoke approach has resulted in consistently positive feedback from learners each year.

Training is delivered on SRC premises, with dates and times planned flexibly to accommodate staff schedules and minimise disruption to day-to-day operations.

Each programme concludes with an annual celebration event, where learners are presented with their certificates and their achievements are formally recognised, reinforcing commitment to continuous professional development.
